AMENDMENTS TO CLAIMS
MADE IN RESPONSE TO FINAL OFFICE ACTION JULY 18, 2002

In the Claims:

Please amend claim 37 as follows:

37.   (Twice Amended) A method for rendering a report including medical language from previously stored data, said method comprising

storing sentences and phrases related to medical data,

inputting patient data via a data input device,

transferring the patient data to a server and tabling the patient data,

transferring the tabled patient data to **[the]** a report rendering component, and

compiling sentences and paragraphs by the report rendering component from the stored sentences and phrases and the patient data, and thereby converting stored medical patient data, including the input patient data, into medical facts in sentence structure.
